Partnership Agreement

Out of national responsibility and duty, and with a contribution to alleviating some of his suffering from epileptic seizure patients and those around them, epilepsy patients suffer from the high and increasing number of sudden deaths across the world, including Morocco, which causes a large and continuous wound, and accordingly we established a working cell that works in the context of collaborative volunteer work.

The Shiatsu Center to control epileptic seizures offers a natural technology that changes the patient's behavior and provides advisory and awareness services. It also works on direct sessions with patients with epileptic seizures by providing behavioral, psychological and motor diagnostic services with the provision of appropriate movements to them according to their deficiency. We work in partnership with all International associations for epilepsy patients, free of charge and voluntarily, and the agreement remains a symbol of love, communication and hope for a bright future.

The Shiatsu Center to control epileptic seizures provides free treatment services for all patients with Epilepsy who are members in the association:

- Association name
- The president of the association
- Telephone
- Email address
- Address
- Number of participants with epileptic seizures
- Date of the signature of the agreement
